Bourne\William™ Tailored To Your Vision

We specialize in manufacturing high-end polypropylene pools from 3/8 inch sheets, ensuring strict quality controls for maximum durability. Our assembly process guarantees perfect watertightness, so no liner or extra sealing is needed.

All our pools are produced from 10mm polypropylene sheets. Each pool undergoes the strictest quality controls to guarantee your investment. All parts are assembled in the factory to ensure perfect watertightness. Choosing a Bourne\William™ pool means bringing well-being, conviviality, comfort, and health into your life.

Enjoy the pleasures of water, the joy of a day with family or friends. Our pools, with their exceptional longevity, will increase the value of your property and add the touch of charm that was still missing. With exceptional longevity, our pools boost your property's value and add a distinctive charm.

Thermal Insulation

Each pool comes standard with a 2-inch XPS (Extruded Polystyrene) panel for enhanced insulation, improving overall pool efficiency.

What is Polypropylene?

Polypropylene is a strong, durable material perfect for pool construction. With 3/8 inch thick walls, our pools are built to last. This material offers sleek designs in various colors. Customize your pool's dimensions, features, and accessories, such as infinity edges, beach entries, and custom stairs.

At Bourne\William™, we proudly manufacture hundreds of monobloc pools each year using thermo-welded polypropylene, all crafted right here in the USA.

Why Polypropylene Pools?

Homogeneous and high-quality material

High-quality, uniform material with a 3/8 inch thick structure that's stronger than traditional shells, preventing cracks. Reinforced with metal supports for superior stability.

Health and environment

PP material is antibacterial, promoting clean water and environmentally friendly manufacturing, ensuring hygiene and safety standards.

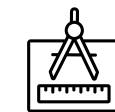

High Durability

- UV stabilized: Polypropylene panels resist fading, even with prolonged sun exposure.
- No risk of osmosis (no resin used).
- Scratch-resistant protective film.
- High resistance to chlorine and salt.
- Withstands extreme temperatures (from -50°F to 160°F)

Eco-Friendly

Our products are 99% recyclable and reduce the need for chemical use.

Customizable

Design your perfect pool! Choose the size, style, and add features like an infinity edge to make it truly yours.

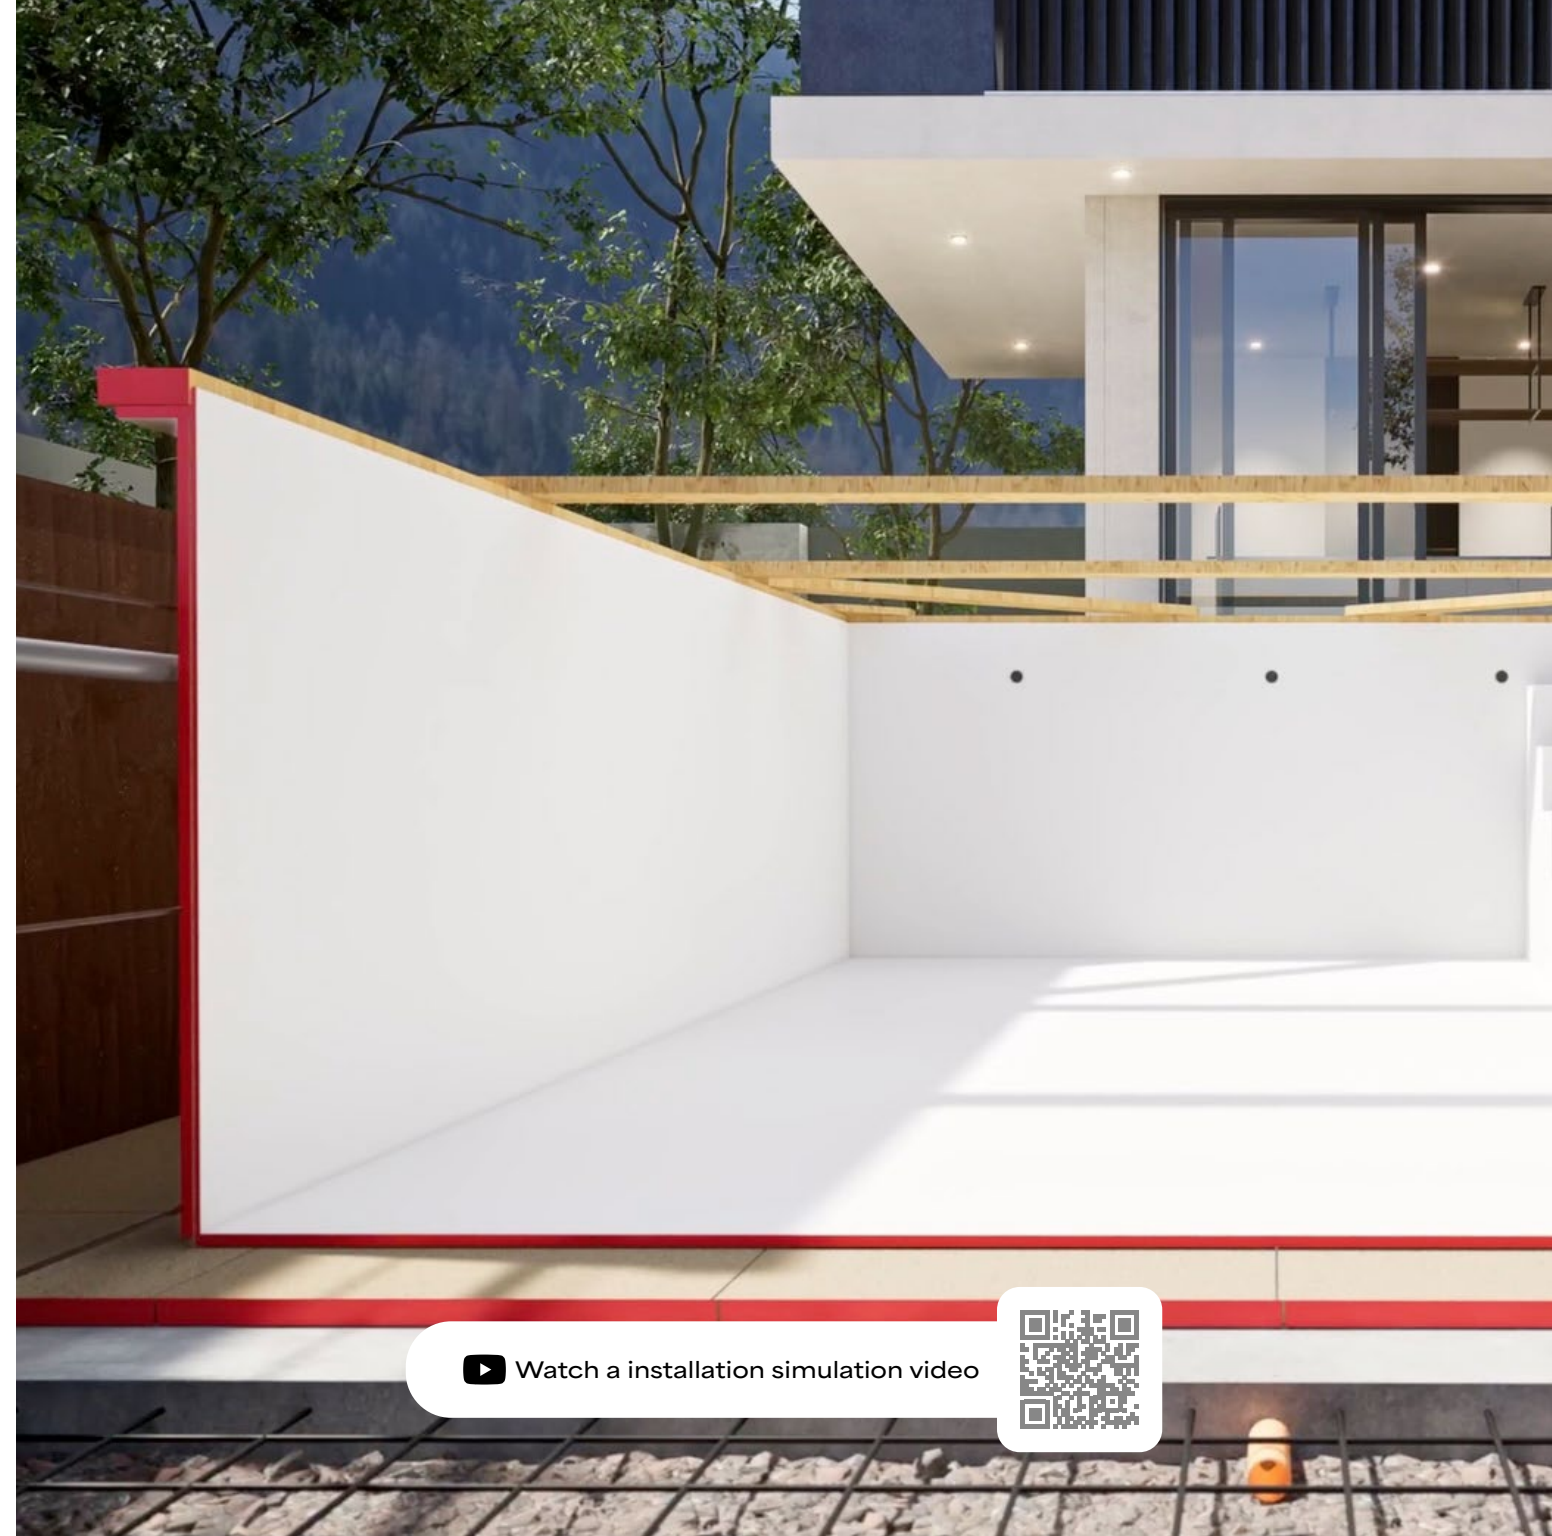

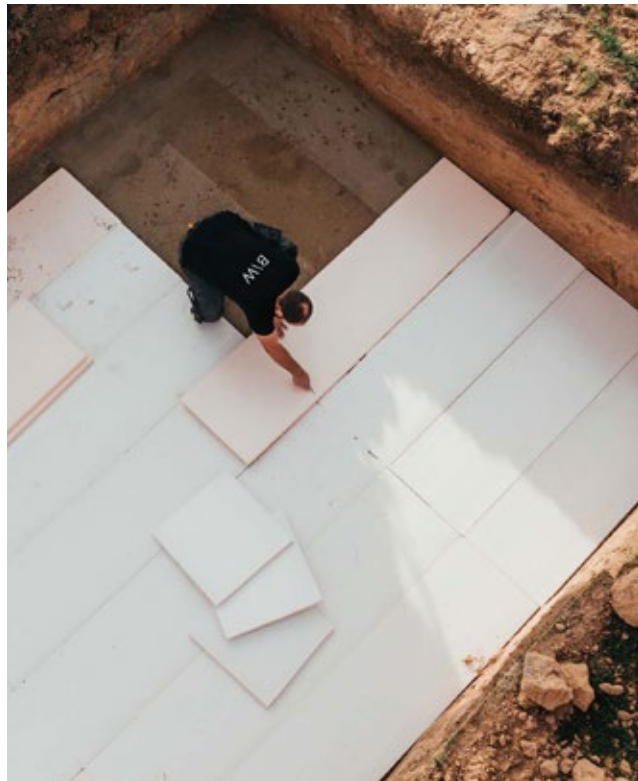

Quick Installation

Our efficient production and installation process means your pool will be ready quickly, keeping your project on schedule.

Installation Made Easy

Installation is designed to be easy and efficient, with a straightforward process for quick setup. Backfilled with concrete and reinforced for added strength, each pool provides a secure, durable swimming environment built to last.

How It Works

Our pools combine top-tier quality, modern design, and reliable performance. We offer two main types—Skimmer and Overflow—each with its own unique filtration system. For something truly exceptional, the Nextgen Signature model elevates pool design with advanced technology and unmatched style.

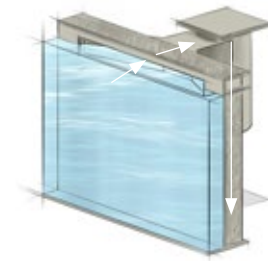

1 Overflow Pools

Water gently flows over the pool's edge into a hidden channel, where it's filtered and recirculated, giving the pool a clean, polished look and maintaining superior water quality.

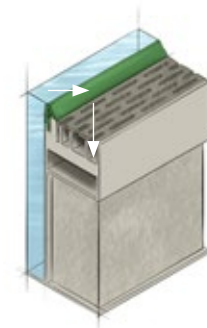

2 Skimmer Pools

Water is drawn through skimmers below the pool's edge, filtered, and recirculated. This system is easy to maintain and offers a classic, reliable design.

3 NextGen Signature

Elevating the overflow system, Nextgen Signature pools combine advanced filtration and modern design to deliver a premium experience that blends luxury with innovation.

Overflow Prime

Functional and Simple

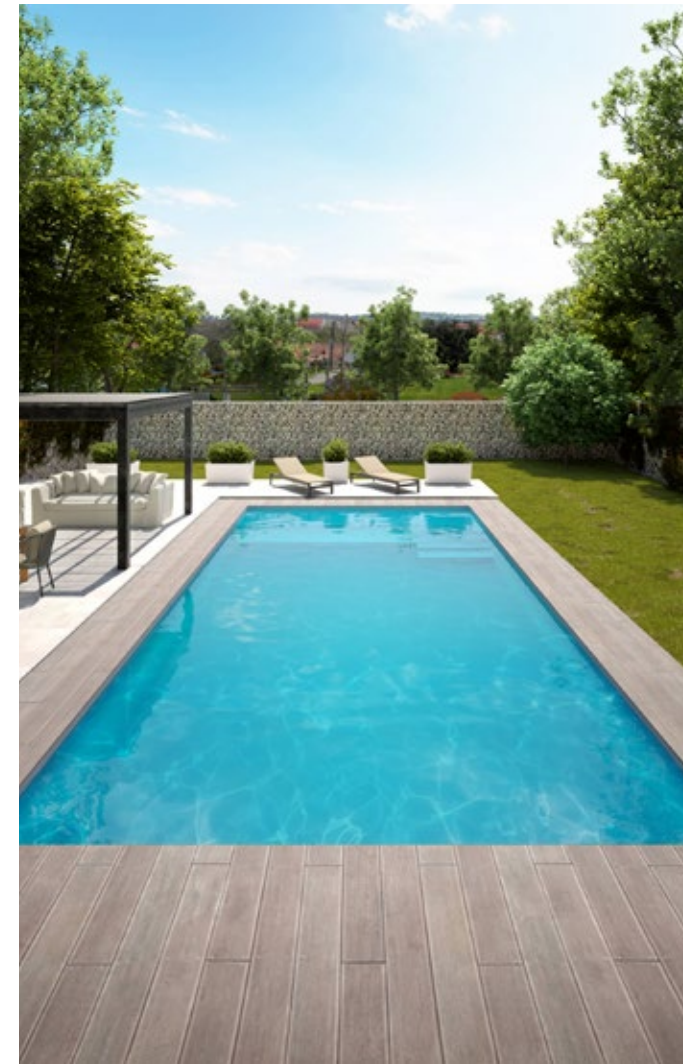

The Overflow Prime model creates a seamless water surface with an elegant overflow system. It features a durable polymer drain gate, with an option to upgrade to Hi-Macs stone in various colors for a stunning, boundless effect.

Skimmer PRO

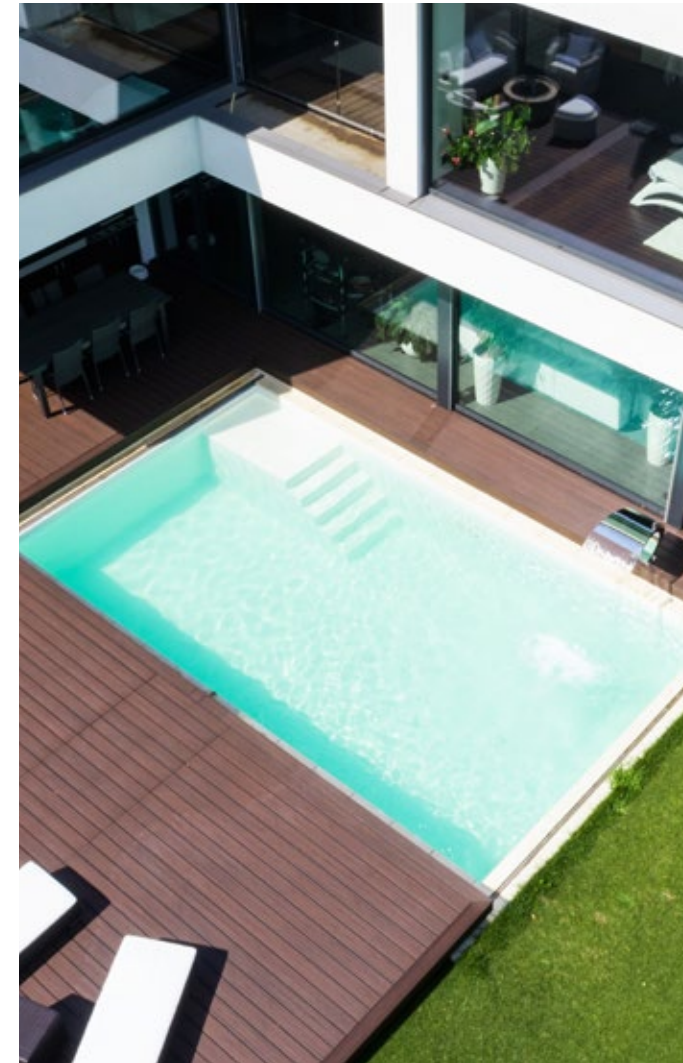

A Classic Solution

Skimmer pools are a favorite for their efficient design and easy maintenance, with a skimmer system that keeps water crystal clear by continuously filtering debris.

Skimmer Invisible

Almost Invisible

Our frameless skimmer pools, featuring an almost invisible and very popular skimmer system, seamlessly blend top functionality with a sleek design for a clean, unobtrusive look.

Overflow Level

Distinctive Shapes

The Overflow Level pool combines luxury and refined design, featuring an elegant overflow system where water cascades over the edges. Enhance the experience with your choice of Hi-Macs stone or the option of real stone.

Overflow Under

Modern and Minimalist

Designed for seamless integration with its surroundings, the Overflow Under model positions the deck or tiles slightly above the water, creating a sophisticated step-down effect into the pool.

Overflow Infinity

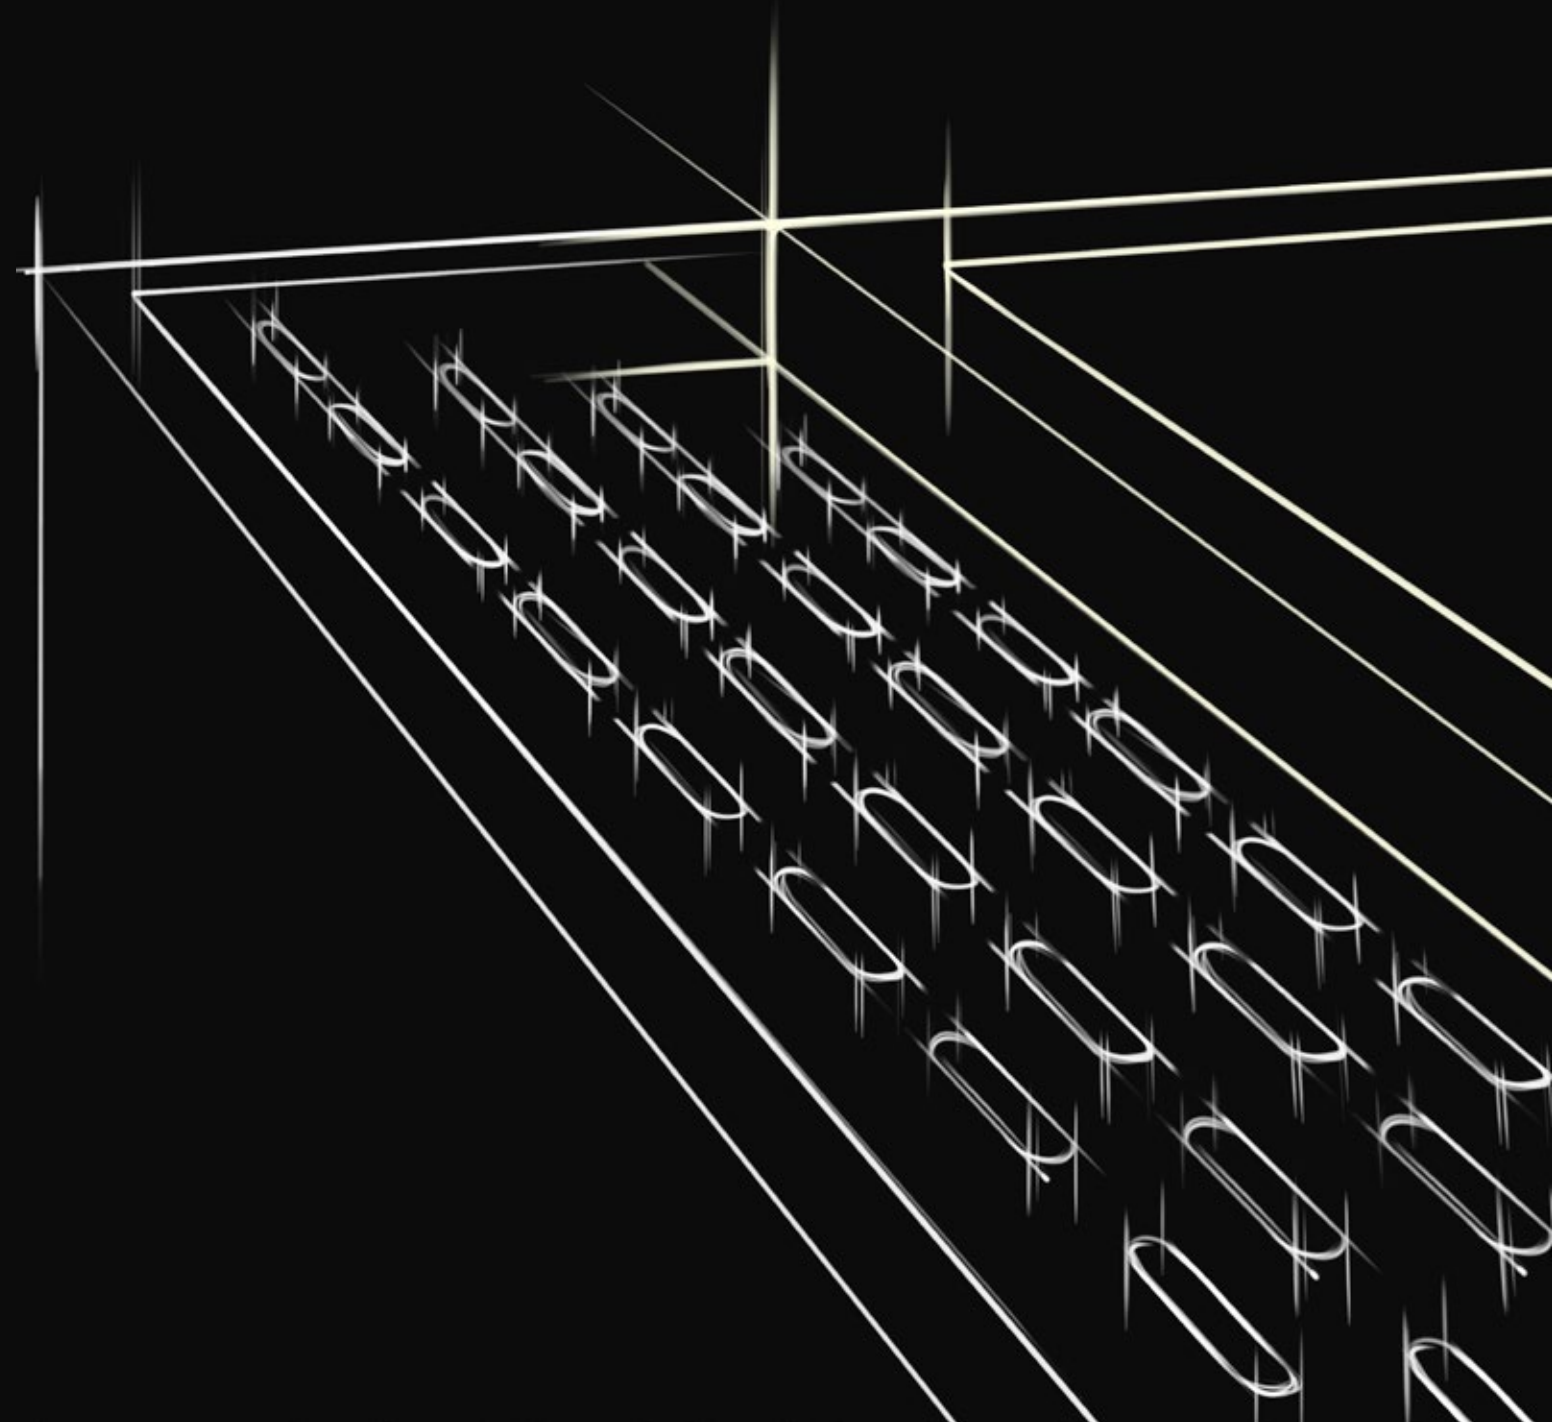

Into Infinity And Beyond

With its timeless edge, the Overflow Infinity model seamlessly merges into the surrounding landscape. Opt for Hi-Macs or real stone to achieve a breathtaking visual that extends to the horizon.

Nextgen Signature

BOURNE\WILLIAM™
PREMIUM POOLS

Overflow Edge Cube

The Overflow Edge Cube model stands as our signature luxury offering, redefining elegance with its unique infinity edge crafted from high-quality Hi-Macs stone. This premium design also includes integrated LED lighting for added sophistication.

Overflow Edge Delta

Part of the luxury line, the Overflow Edge Delta model offers a unique design twist. Similar to the Overflow Edge Cube, but with a diagonally crafted outer edge, it brings a dynamic look to the classic infinity edge.

Entrance Into The Pool

Combining style and function, our pool stairs are designed to suit any pool size or style. With a range of color options and customizable features, they provide easy access while complementing the pool's overall aesthetic for a seamless, stylish entry and exit.

Pool Colors

Choose from our vibrant palette of 8 stunning pool colors to personalize and enhance your swimming experience. Additionally, we offer special Hi-Macs stone colors, perfect for crafting infinity edges and other unique features, bringing a distinctive elegance to your pool design.

Harmony and Design

Lights and jets are carefully integrated into the pool walls, creating a clean and elegant look. This design not only improves the pool's appearance but also increases safety and comfort by eliminating any protruding elements.

Advanced Pool Technology

We equip our pools with top-of-the-line technology for ultimate convenience and performance. From automated control systems and efficient pumps to energy-saving heaters and advanced salt systems, our pools offer the latest in pool technology. Customize your setup further with automated covers, swimming streams, diving boards, slides, tanning shelves, and more to perfectly suit your lifestyle.

Sustainability

In our commitment to ecological responsibility, we ensure that the pool manufacturing process aligns with high environmental standards. Sustainability is at the core of our practices, and we actively seek ways to reduce our environmental footprint. This includes not only recycling materials but also exploring energy-efficient production methods and minimizing waste generation.

NOTICE

The manufacturer stands behind the quality of its products as outlined in the written warranties. Your dealer, builder, or contractor operates independently and is not an agent or employee of the manufacturer. Therefore, the manufacturer cannot and does not assume responsibility for any representations, statements, or agreements made by any dealer, builder, or contractor.

The specifications in this brochure were accurate at the time of printing but are subject to change without notice.

The manufacturer does not produce slides, diving boards, or any other diving equipment. Any use of such equipment must strictly comply with the manufacturer's guidelines and all applicable local building codes and regulations.

For safety, always ensure the use of safety fences, safety covers, and handrails as recommended by the PHTA Standards. In some photographs, safety lines, signage, and barriers may have been removed for visual clarity. However, we strongly advise that safety lines, floats, and other protective measures be installed and used at all times to prevent accidents.
